# Education in Chemistry - Index 1988

## Subject

A-level, effect of GCSE on, 64, 70(L), 172(L)
A-levels, future of, 137(C)
Adsorption on surfaces, microcomputer plot, 178
American chemical education, 136(C)
Analytical balance, 158(L)
Aniline purple, 66(C), 81
APU research, 7, 125(L)
ASE meeting, Nottingham, 34(C)
Assessment of Performance Unit, 7, 125(L)
Attitudes to chemistry, 176
Audiovisual reviews
  Architecture of matter, 79
  Competition, 79
  Entropy (cassette), 130
  pH (video and computer disk), 160
Authors' notes, 5(C)

Balanced science, 100, 158(L)
BET equation in 3D, 178
Biochemistry in undergraduate curriculum, 68(C)
Bond orders, 11
Book reviews
  A-level texts, 192
  Analytical chemistry, 192
  Assessment, 192
  Biochemistry, 191
  Chromatography, 61
  Demonstrations, 160
  Developing countries, 27, 129
  GCSE texts, 27, 77, 129, 191
  General chemistry, 191
  Industrial chemistry, 26
  Medical chemistry, 129
  Metabolism, secondary, 26
  Microcomputer applications, 77, 161
  Modular resources, 27, 160
  Organic chemistry, 26, 77, 160, 161
  Organic chemistry, history of, 27
  Physical chemistry, 26
  Public understanding of chemistry, 27
  Scientific writing, 130
  Silicon, 26
  Spectroscopy, 61, 130
  Teaching, 79, 160
BRIEF, 4(C)
British Association science and technology screen awards, 37(C)

Cambridge Structural Database, 25
Careers, 106
Cathodes, terminals and signs, 52, 159(L)
Cells, electrolytic and voltaic, 52, 159(L)
Chemicals from leeches, 67(C)
Chemical bonds, quantum model, 49
Chemical education research, 7, 37(C), 89
Chemical Olympiads, 104(C), 168(C)
Chemistianity, 41
Chemistry vs double certificate science, 100, 158(L), 172(L)
Chemistry Week, 135(C)
Chemtech, 164
China, chemistry teaching in, 107, 180
Computers in teaching, 168(C)
Conformation of cyclic molecules, 113
Coordinated science (Suffolk Development), 39, 172(L)

Data capture, 115
Demonstrations, 86, 109, 150
Determination of inorganic anions, 12,
Developing countries, 118
Distillates, 73, 157
DIY balance, 158(L)
Double award science, 39, 172(L)
Double certificate science and chemistry, 100, 158(L)

*Education in Chemistry*, subject coverage, 70(L)
Elgar, 167(C)
Energy and the chemist, 2(C)
Enthalpy of mixing, 121
Entropy of mixing, 44
Environmental chemistry, models of, 20
European Conference on Computers in Education, 168(C)

Gadd, Ken, 134(C)
Gas, natural, properties, 183
GCSE, assessing process skills, 142
GCSE, link to A-level teaching, 64, 70(L), 172(L)
Groups in periodic table, debate, 139

Hertfordshire teaching scholarship, 135(C)
Higginson Report, 137(C)
Hindenburg, 86, 125(L)
History tour, 169(C)
Homogeneous equilibria, 44

Image of chemistry, 104(C), 176
Industry study tours, 4(C)
Inorganic anions, determination, 12
Inorganic mixed-valency compounds, 15
Inorganic reaction mechanisms, 6(L)
Interfacing, 115, 145, 146
Ion chromatography, 12

Kinetics, intensity comparator experiment, 17
Kinetics using microcomputers, 84

Lecture demonstrations, 86, 109, 150
Leeches, 67(C)
Liberal arts colleges, teaching in US, 148
Light intensity comparator, 17
Local resources in chemistry teaching, 118

Microcomputers in *Education in Chemistry*, 96
Microcomputer applications, 20, 84, 112, 113, 115, 145, 146, 178, 183
Microwave ovens, 55
Mixed-valency compounds, 15
Molecular graphics, 25
Molecular orbitals, 49
Multiple bonding, 11
Multiple choice tests, 46, 125(L)
Musical chemists, 167(C)

National curriculum, 2(C), 34(C), 166(C)
Natural gas, calculation of properties by computer, 183
Neris, 37(C)

Open University, new course, 104(C)
Open University TV Guide, 28
Organic magnet, 3(C)
Organic synthesis using microwave ovens, 55

Pericyclic reactions, 112
Periodic table, 139, 185
Perkin, William, 66(C), 81
pH electrodes and microcomputers, 145
Plunkett, Roy, inventor of Teflon, 173
Politics in chemistry teaching, 180
Practical work in GCSE, 142
Process skills, assessment, 142
Project Science, 5(C)
Project Seraphim, 167(C)
Public understanding of chemistry, 104(C), 176

Quantities and units, pupil difficulties, 92

RSC Chemical Education Award, 69(C), 134(C)
RSC Congress, Canterbury, 102(C)
RSC meeting, Birmingham, 168(C)
RSC Research Fund grants, 69(C)

Salters' Institute innovations fund, 135(C)
Schools video, 168(C)
Scientific research in schools, 68(C)
Sellars, John Carrington, 41
Seraphim software, 167(C)
SIFT, 58, 126, 188
Simulation of environmental chemistry, 20
Software reviews
  Cellular modelling system, 161
  Chemistry in action, 192
  Computational chemistry software, 130
  Library of physical chemistry software, 191
  Organic synthesis design, 80
  Orgsynth, 191
  Oxidation and reduction, 80
  Powergraph, 161
SPISE, 136(C)
STAIR, 37(C)
Stereochemistry, 113
Stoichiometry, pupils' difficulties, 92
Students' impressions of chemistry, 176
Students' understanding of symbols, 89
Student skills, 6(L)
Suffolk Science, 39, 172(L)

Techniquest, 138(C)
Technological approach to chemistry, 164
Technology Education Project, 103(C)
Teflon, discovery of, 173
Terminals and electrodes, 52, 159(L)
Test scores, getting more information, 46, 125(L)
Thermodynamics, 121
Thompson report, 166(C)
Toronto, Chemical Congress, 136(C)

US liberal arts colleges, 148

Victorian chemistry, 41
Video, making, 153

Wessex Project, 134(C)
Women, exploitation of, 125(L)

X-ray structure data files, 25
